

Executive Summary

Founded in 1994, 3t Systems is a leading business and IT consulting firm based in Denver, Colorado. Established on the fundamentals of network support and administration, 3t Systems has grown with its customers to provide proven and progressive end-to-end IT services including collaboration, virtualization, and managed services coupled with performance-driven business consulting.

We work hand-in-hand with our clients to strategically integrate technology throughout the business. At 3t Systems, we believe technology should not be an afterthought. It should be an integral part of the business plan, because the right solution can invigorate and propel an entire organization. 3t Systems has teamed with clients across various industries including finance, healthcare and construction, and organizations ranging in size from small businesses to enterprise operations.
