

Senior V&S Consultant

3t Systems is an end-to-end IT consulting firm that helps organizations realize their full business potential by strategically integrating technology into everyday business operations. Our team of accredited consultants has more than 300 combined years of field-deployment expertise in collaboration, managed services and virtualization technologies. It's this level of expertise that enables 3t to consistently deliver solutions that streamline communications, boost productivity and maximize investments.

We are currently seeking a Senior Consultant who specializes in Virtualization and Storage (V&S). A 3t Systems Senior V&S Consultant maintains the design and integrity of the client's V&S systems along with coordinating complex projects. S/he implements and manages V&S technologies to form a solution from inception through maintenance. In addition, the Senior V&S Consultant provides all onsite service and support needs for our clients. This service and support relates to all technology which includes but is not limited to: workstations, servers, printers, networks, and vendor specific hardware and software.

Responsibilities:

- Provide all onsite and ongoing technical service and support for our clients
- Deliver technology solutions for clients on time and on budget
- Implement advanced infrastructures for server, desktop and application virtualization
- Keep informed about and gain expertise to make use of existing and newly added functionality in Citrix, VMware, and Microsoft virtualization solutions
- Gain in-depth understanding of client's business processes, gather data requirements, and create the appropriate technology solution to solve the business issues
- Assist the Lead Architect with developing functional specifications for design and reporting requirements
- Contribute technical expertise to project documentation
- Understand and implement the solutions designed by the Lead Architect
- Establish and implement virtual infrastructures, application delivery solutions and/or server and network infrastructure component
- System documentation to include system reviews and recommendations
- Be an active member of 2 technical and 1 business community of interest
- Act as a technical mentor to other consultants
- Demonstrate strong support and customer service orientation
- Perform on-site assessments and infrastructure analysis
- Perform Knowledge Transfer including training and documentation.
- Supporting existing and new deployments
- Ability to analyze and resolve issues related to technology
- Look for opportunities to improve the client's productivity and efficiencies through technology
- Ask questions and seek to develop a deeper understanding of the client's business and how IT can be used to assist the achievement their business strategy and goals
- Document internal processes and procedures related to duties and responsibilities
- Other responsibilities as assigned

Qualifications:

- Minimum 3-5 years of consulting/industry experience
- 4 or more V&S full life cycle implementation or equivalent
- Knowledge of "best practices" in functional areas and ability to apply knowledge of the technology to add value to client implementations
- Ability to work independently
- Excellent verbal and written communication skills
- Comfort interfacing with clients on a regular basis
- Basic knowledge of routers, bridges, gateways, hubs, switches, telecommunications carriers, and WAN protocols
- Ability to travel and work long hours when needed
- Industry certifications in virtualization technologies (e.g. MCITP, CCEE, CCEA, CCIA, VCP and/or VCAP)
- Training delivery in a classroom environment is a plus
- Experience with ConnectWise is a plus

Interested candidates, please send resume and cover letter to samantha.morgan@3tsystems.com.
